

ManageFD for Windows

Readme

Installation

Download ManageFDSetup.zip.

Extract the file in folder say **c:\temp**

Execute Setup.MSI

The setup will ask you to specify path for installing the application. Specify path such as c:\managefd or d:\managefd.

NOTE: If you keep the default path same as shown by setup then depending on your windows settings you may face problem while saving the data. If you are not able to save the data then try running ManageFD.Exe as 'Administrator'

If prompted, download and install adequate version of Microsoft .Net Framework.

The free version allows you to create 25 companies and 50 deposits.

Registration for licensed version

With licensed version there is no restriction on number of entries.

For using licensed version, you should perform following steps

1. Run ManageFD.Exe. Depending on your security settings you may have to execute the program as administrator.
2. Goto Masters - Registration Menu
3. Program will display your Installation id.
4. Please mail us the installation id.
5. We will provide you License Key, which should be entered by you on registration screen.
6. Note your purchase, entitles you for 1 license key which will work only one machine. For using it on multiple machines you will have to buy separate license for each.

Note :

1. **Visit Help-Readme menu before you decide to use the product.**

If you decide to use the product, then its assumed that you agree with the same.

- 2 Any bug, problem reported to us will be fixed in 2 working days. Support is provided only for paid version. Free version will not be supported.
3. For any query, suggestion you can mail us at managefd@gmail.com

Getting Started

Before you enter any transaction following basic information should be created

- Bank, Bank Branches

- Companies where you have maintained FD, Company Branches

- PPF Rate, TDS Rate

- Names of Depositors

The fixed deposit handling has following options

- Create FD This captures all information that you enter on FD application form.

- Open FD ... The company provides you receipt no and you know exact start date of FD after you get receipt

- View /Modify Receipt, Close Receipt, Reopen Receipt

Reports can be viewed on screen. If you have excel installed on your machine then reports can be exported to xls.
